

Generating A Referral

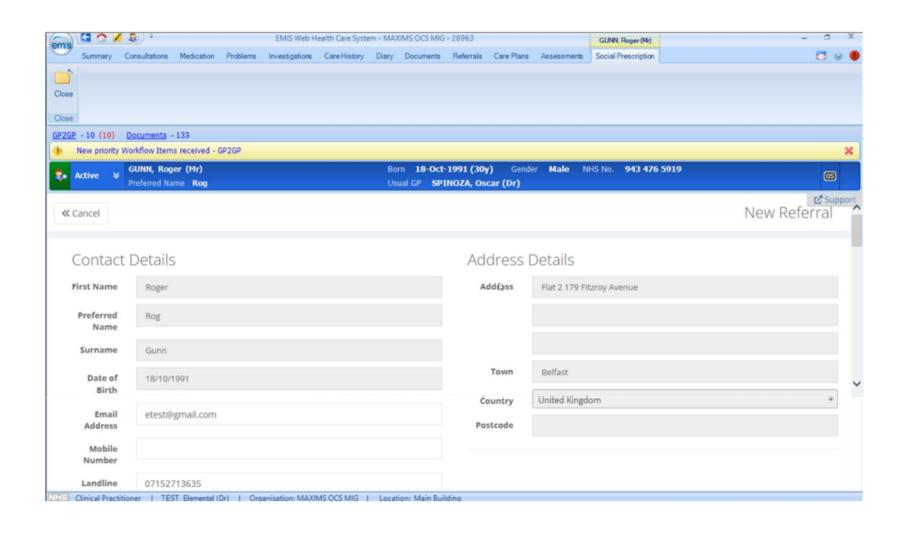

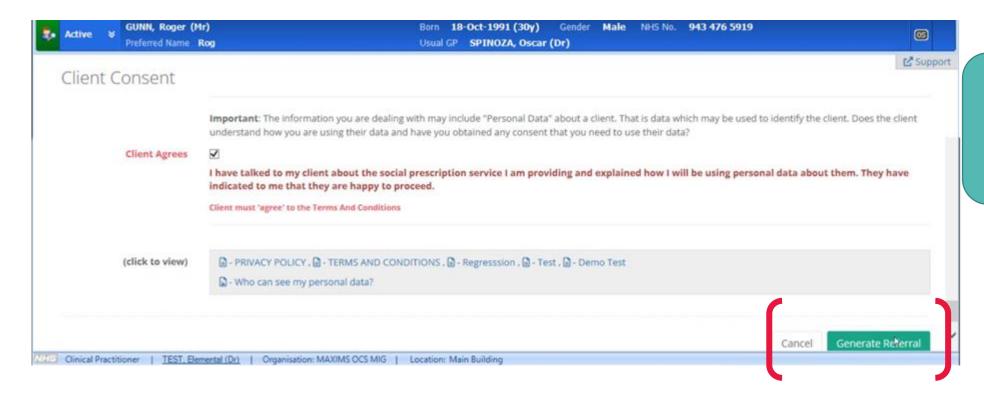

Generate New Express Referral

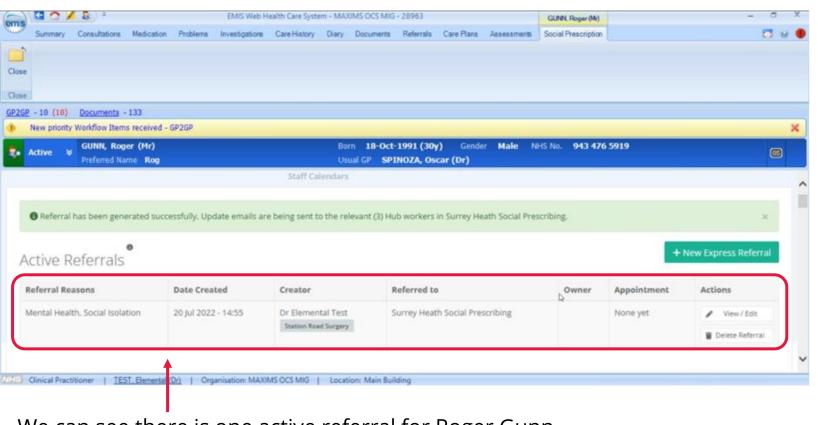

The client's contact and address details will pull across from EMIS.

The Referral Form will then need completing.

Select 'Generate Referral'

We can see there is one active referral for Roger Gunn.

The Healthcare Professional can see active, processed and declined referrals for patients within their Healthcare Establishment.

The referral is generated.

The Healthcare Professional can view:

- Active Referrals Referrals that
 have been successfully sent to the
 relevant hub and not yet processed.
- Processed Referrals Referrals picked up by link workers.
- Declined Referrals Referrals that have been declined from the 'Manage Referral' section.

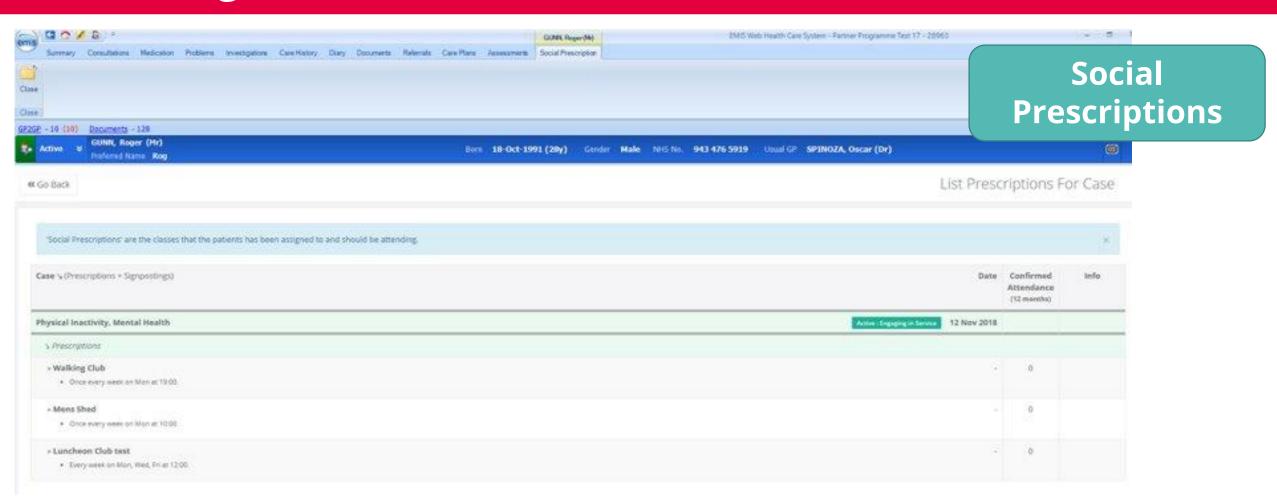

Reviewing A Referral

Referral Agents can view any Social Prescriptions generated for their patients.

Progress Scores

Referral Agents can view any health and wellbeing data recorded for their patients.

Referral Agent Notes

If any notes have been sent back by a Link Worker, this will be indicated in the Actions column of the patient's 'Processed' referrals which they can select. The notes will then appear as below.
